

POWERED BY NERA AI

Your patients don't stop being sick between appointments.

Agatsa One gives you a continuous window into your patients' cardiac health — ECGs, vitals, glucose, and AI risk scores — without adding a single minute to your clinic day.

98.15%ECG sensitivity

What you get with Agatsa One

Real-Time ECG Review

Patients send ECG readings directly from their SanketLife device. Review 12-lead tracings in your portal before appointments. Spot arrhythmias, ST changes, or normal patterns — before the patient walks in.

Daily Vitals Dashboard

See glucose trends, BP readings, SpO2, weight, and HRV for all your patients in one scrollable dashboard. Filter by risk level. Focus your attention where it's needed most.

Nera AI Risk Scores

Every patient gets a continuous AI health risk score updated after each vital log. See the score, the trend, and the triggering signal. Catch deterioration between visits — not after a hospital admission.

Smart Alerts

Set custom thresholds. When a patient's ECG shows a red flag or their glucose spikes beyond range, you get an instant notification. No manual chart review. Just the signal that matters.

Care Programmes

Enrol patients in structured 8–12 week programmes: Cardiac Recovery, Hypertension Control, Diabetic Cardiac Care, Weight & Metabolic, or your own custom protocol. Track adherence and milestones.

Pre-Visit Reports

Nera AI automatically generates a plain-English summary of the past 30 days for each patient — ready for you to review in 60 seconds before the consultation.

Pricing — Simple & Transparent

Plan	Price	Patients	Features
Individual Doctor	FREE	Up to 10	ECG review, basic vitals dashboard
Clinic	₹4,999/mo	Up to 100	All features, care programmes, team access
Hospital Grade	₹39,999/mo	Unlimited	White-label, EMR integration, dedicated support

Clinical Validation: ECG technology validated at **98.15% sensitivity** at Sri Jayadeva Institute of Cardiovascular Sciences, Bengaluru — compared to Mortara ELI 250c hospital-grade ECG. Glucose estimation validated at **98.56% accuracy** at Medanta. **CDSCO Class B Medical Device** Licensed — MFG/MD/2023/000231.
