

EMPLOYEE HEALTH INTELLIGENCE

Your employees' hearts are working overtime. **Are you watching?**

Cardiac disease is India's #1 cause of workplace mortality. Agatsa One's corporate wellness platform gives you real data on your workforce's cardiac health — and the tools to act on it — before it becomes a claim.

₹3.2L

Average cost of one cardiac hospitalization claim in India

68%

Of cardiac events occur in people with no prior diagnosis

8 wks

Average time to measurable BP/glucose improvement on programmes

agatsaone.com/for-corporates

What's Included

Biometric Screening Camps

We deploy ECG and vitals screening at your office. Every employee gets a 3-minute SanketLife ECG, glucose estimate, BP, and SpO2 reading. Results are instantly in the Agatsa One portal. No paperwork. No manual data entry.

12-Week Cardiac Wellness Programme

High-risk employees are enrolled in a structured programme with daily monitoring, AI-guided tasks (diet, exercise, medication), and weekly progress reports. You see aggregate cohort data — never individual health records.

Anonymous Population Dashboard

Your HR team gets a real-time anonymised health dashboard: risk tiers, programme adherence rates, aggregate BP/glucose trends, and alerts when your population health score changes. Individual data is always private.

ROI Calculator — Estimated Annual Impact

	100 Employees	500 Employees	2,000 Employees
Platform cost / year	₹2.4L	₹9.6L	₹28.8L
Cardiac claims prevented (est.)	2–3 events	10–15 events	40–60 events
Estimated savings	₹6.4–9.6L	₹32–48L	₹1.28–1.92Cr

Estimates based on average cardiac hospitalization cost of ₹3.2L and 68% of events being detectable with continuous monitoring. Actual results may vary.

Privacy First — Always. Employee health data is always private. HR and management see only anonymised, aggregate risk tiers — never individual readings, diagnoses, or health scores. Employees own their own data. **Agatsa One is compliant with India's DPDP Act 2023.**
