KEY PUBLICATIONS REFERENCING SANKETLIFE

Assessment of Diagnostic Accuracy of SanketLife 2020

Indian Pacing & Electrophysiology Journal (IPEJ) · Elsevier · PubMed Indexed

Prospective trial, 100 patients at Sri Jayadeva Institute, Bangalore. Matched gold-standard GE-2000 with **98.15% sensitivity & 100% specificity** for LBBB, RBBB, ST-segment changes & AV blocks. Co-authored with Emory University & Texas A&M.

Identifying Prevalence of Life-Threatening Atrial Fibrillation 2019

Journal of Practical Cardiovascular Sciences · Medknow / Wolters Kluwer

Analysed **8,005 SanketLife ECG reports** over 2 months across home, OPD & PHC settings. First large-scale real-world SanketLife dataset. Confirmed feasibility for **continuous AFib monitoring** across all care levels.

Wireless, Pocket-Sized ECG Monitor: A Potential Tool in CVD Detection 2016

Journal of Advanced Research in Medical Science & Technology · ADR Journals

Agatsa's foundational accuracy study. 6-lead ECG intervals validated against traditional ECG. Established **high sensitivity & specificity** as a field-deployable device. **First published clinical evidence** for SanketLife.

Smart Phone ECG – Bridging the Gap 2018

Journal of Practical Cardiovascular Sciences · AIIMS New Delhi, Dept. of Cardiology

GLOBAL JOURNAL COVERAGE

India — 7 journals

cardiac policy

WHAT THE EVIDENCE COLLECTIVELY PROVES

- **Diagnostic equivalence:** Matches hospital-grade ECG with 98.15% sensitivity & 100% specificity for major cardiac conditions
- **Real-world scale:** 8,005+ scans validated across home, PHC, OPD and hospital — not just lab conditions
- **AFib detection:** Identifies life-threatening atrial fibrillation, including paroxysmal cases missed by traditional Holter
- **Community acceptance:** 97.5% patient satisfaction in urban slum health settings
- **Emergency use:** Recommended by BMJ & Indonesian Journal of Cardiology for COVID-era QT surveillance

AIIMS cardiologists reviewed smartphone ECG in India. **SanketLife listed alongside AliveCor/Kardia** as one of India's two key medical ECG devices. Validated for arrhythmia & acute coronary event detection.

Acceptance & Feasibility of Handheld Tele- 2020 ECG

Indian Journal of Community Health · Vol 32, Issue 3

410 patients screened at urban health centre. **97.5% reported high satisfaction.** LVH detected in 15.4% — previously undiagnosed. Concluded telecardiology bridges primary–secondary care gap in resource-poor settings.

Minimal/No-Touch ECG & Remote 2020 Monitoring in COVID-19 Era

Indonesian Journal of Cardiology · DOI: 10.30701/ijc.1010

SanketLife cited as key **wireless, no-touch ECG solution** for COVID-19 cardiac risk monitoring — eliminating direct electrode contact while maintaining diagnostic quality.

Rolling Out HCQ Prophylaxis in India's 2020 Slums

BMJ Blogs · British Medical Journal

BMJ article **explicitly recommended SanketLife (ref [22])** for QT interval monitoring before mass HCQ administration in Mumbai's slums — citing it as the practical solution for resource-limited settings.

- **AIIMS validation:** Named by AIIMS New Delhi cardiologists as one of India's two key smartphone ECG devices
- **Industry recognition:** EY MedTech India Report 2024 highlights AI-powered portable ECG as a priority innovation — SanketLife leads this segment in India

"SanketLife showed high sensitivity (98.15%) and specificity (100%) in diagnosing major cardiovascular conditions... a low cost, portable, pocket-sized 12-lead ECG that can be used in any care setting."

— Indian Pacing & Electrophysiology Journal, Elsevier · Sri Jayadeva Institute of Cardiology, Bangalore · 2020

PUBLICATION TIMELINE

- 2016** **First paper** — 6-lead accuracy & field validation · ADR Journals
- 2018** **AIIMS recognition** — Smartphone ECG Bridging the Gap · JPCS
- 2019** **8,005-scan AFib study** · JPCS / Medknow / Wolters Kluwer
- 2020** **IPEJ gold-standard study (98.15%)** · BMJ · Indonesian Journal · Community Health
- 2021–24** **Global AI ECG reviews** — JMIR Poland · Korean KISTI DB · Indian ECG Society
- 2025** **AI AFib systematic review** · Egyptian Heart Journal · EY MedTech India Report
